

The world on its axis

The world is turning on its axis the sun shining in the sky the moon and stars never fail to be out at night, the trees are growing, the seas, rivers, oceans, creeks and streams are flowing.

The fish are jumping, birds are in the sky and everywhere living things are breathing.

The world is in full action upon each continent.

Eons of time have come and gone.

The Earth and everything in it, is existing without seemingly a limit of time.

How much do we pay for this majestic excellent creation?

How did it come to be?

Darwin did not put the stars in the sky nor turn the Earth on its axis,

Nor none of his theories give breath daily to all life,

He who created man said we do not understand and he forgives us for failing to obtain the knowledge and keep it in our mind.

Whether we seek the knowledge or not someone is taking care of this world and everything that's in it and everything and all systems that exist anywhere and you ought to want to know who takes care of you and your world.

How hard is it to say from your heart thank you Emmanuel (God is with us)

Thank you Jesus for eternal life?
